

## Relay

The Click 120 provides an interface between Click contact closure devices and signaling systems. Isolations, signal translation, and noise immunity are all inherent to these relays.

- Super thin design
- Features vibration-resistant plug-in bridge system
- Integrated input wiring and protective circuit
- Terminals feature easy-to-use screw connection
- Relay section can be easily removed using engagement lever if it needs to be replaced
- High level of operational safety
- Relay portion features cadmium-free, environmentally friendly power contacts
- Status-indicating LED
- 4 kVrms electrical isolation between input and output on relay
