

Wireless surge protector

The Click 250 is a 100 MHz–3 GHz 90 V coaxial wireless surge protector. The ultra-fast gas discharge tube design gives quick response to power surges and dumps the excess power safely to ground.

- Ideal for IEEE 802.11b and 802.11g wireless LAN applications, as well as ISM, MMDS, and cellular and PCS applications
- Passes DC power
- Bulkhead N-female to N-female connector
- Both connector ports are equally protected
- Ground lug and terminal are located directly on the housing of the device
- Bi-directional protection
- Easily replaced gas tube element
- Multi-strike capability
- Features rubber O-ring seal
- Fast response time
