

Unmanaged gigabit ethernet switch

The Click 330 is used for quick and cost-effective Ethernet network expansion at the field level. The RJ-45 ports offer auto-crossing and auto-negotiation functionality.

- Gigabit speeds on all ports
 - DIN rail-mounted for quick and easy installation
 - Supports copper fiber
 - Redundant power supplies
 - Alarm contact closure allows for monitoring of power redundancy
 - Auto-crossing and auto-negotiation on all copper ports
 - Supports QoS
 - Range: 300 feet
 - Pluggable screw terminals can be removed for prewiring
 - 2 LEDs indicate link status and activity
 - Supply voltage: 9–28 VDC
- Complies with IEEE 802.3, store, and forward switching mode
 - Eight RJ-45 ports
